STI COLLEGE DAVAO

2022 – 2026

TECHNICAL SKILLS

Frontend:

- HTML5, CSS3, JavaScript, React.js, Next.js, Nuxt.js, Tailwind CSS

Backend:

- Laravel, Node.js, RESTful API Development, Graph API Integration

Database:

- MySQL, PostgreSQL, MongoDB, Database Design & Optimization

Tools & Workflow:

- Git, GitHub, Figma, VS Code

EXPERIENCE

SOFTWARE DEVELOPER INTERN | OBIYEN (AWORK.DK)

January 2026 – June 26 | Philippines

- Implemented OAuth 2.0 authentication for Facebook and Instagram agency-level integrations, enabling secure client workspace access.
- Developed Facebook Graph API integrations for post management (CRUD), mention tracking, engagement analytics, and tag reporting.
- Resolved large-file upload issues in Facebook integrations and standardized backend responses with frontend contracts.
- Built the Password Manager module end-to-end, including licensing, user assignment, APIs, services, and database integration.
- Refactored the SEO Ranking module by integrating SerpAPI and Google Ads API, reducing dependency on Google Search Console.
- Fixed Microsoft OAuth authentication issues and improved survey analytics data processing for dashboards and reports.
- Developed the Timesheet module with approval workflows, project hour tracking, monthly reporting, and superadmin override capabilities.
- Built the Quotation module end-to-end, including template management, pricing calculations, PDF/web generation, digital approvals, comments, and reporting.
- Enhanced the DocFlow module with bulk template management, role-based visibility controls, and WCAG 2.1 AA accessibility compliance.
- Designed and implemented a chat ownership system enabling agent assignment, transfers, and prevention of concurrent responses.
- Contributed to the WorkFlow module and implemented Danish and English localization across the platform.
