

CYRIL JIAN B. NARVASA

Full Stack Developer

+63 906 584 5902 | cyrilnarvasa589@gmail.com | github.com/Cyannimazing | portfolio-cyannimazing.vercel.app

PROFESSIONAL SUMMARY

Cum Laude graduate (GWA 1.39), BS Information Technology, STI College Davao. Full Stack Developer with enterprise internship experience and solo SaaS product ownership. Proficient in OAuth 2.0, RESTful APIs, Graph API, real-time systems (WebSocket/Pusher), WCAG 2.1 AA compliance, VPS deployment, and CI/CD workflows. Applies SOLID principles and Repository/Service/Interface design patterns. Effective in both agile team settings and fully independent development.

PROFESSIONAL EXPERIENCE

Software Developer Intern | Obiye (awork.dk)

January 2026 to June 2026 | Philippines

Full Stack contributor on an enterprise multi-module SaaS platform using Nuxt.js, Vue 3, Laravel, PostgreSQL, TypeScript, and Pusher.

- Implemented OAuth 2.0 authentication flows for Facebook and Instagram agency-level integrations, enabling secure multi-client workspace access and eliminating manual token management.
- Developed Facebook Graph API integrations for full CRUD post management, mention tracking, engagement analytics, and tag reporting, expanding the platform's social media reach to Meta channels.
- Diagnosed and resolved large-file upload failures in Facebook integrations and standardized backend response contracts with the frontend team, reducing integration bugs by eliminating schema mismatches.
- Architected and delivered the Password Manager module end-to-end including licensing, user assignment, REST APIs, service layer, and database schema, providing a secure credential vault for enterprise users.
- Refactored the SEO Ranking module by integrating SerpAPI and Google Ads API, reducing dependency on Google Search Console and improving keyword data accuracy for client reporting.
- Resolved Microsoft OAuth authentication failures and enhanced survey analytics data processing pipelines, restoring login access and improving dashboard reporting reliability.
- Designed and built the Timesheet module with approval workflows, project-based hour tracking, monthly reporting, and superadmin override capabilities, enabling accurate payroll and resource management.
- Constructed the Quotation module end-to-end covering template management, dynamic pricing calculations, PDF/web generation, digital approvals, threaded comments, and reporting, streamlining the client proposal lifecycle.
- Enhanced the DocFlow module with bulk template management, role-based document visibility controls, and WCAG 2.1 AA accessibility compliance, improving usability for users with disabilities.
- Designed and implemented a real-time chat ownership system using Pusher with agent assignment, transfer logic, and concurrent-response prevention, ensuring structured and accountable customer support operations.
- Contributed features to the WorkFlow project management module and implemented full Danish and English platform-wide localization, expanding the platform's accessibility to Danish-speaking enterprise clients.

Full Stack Developer (Solo) | Cynergy (cynergy.cloud)

April 2026 to Present | Philippines

Sole developer on a partner-owned multi-tenant SaaS platform built with Nuxt.js 3, Vue 3, TypeScript, Laravel 12, SQLite, Sanctum, and Spatie Permission. Handles all development, VPS infrastructure, and deployments independently.

- Architected a multi-tenant SaaS platform supporting multiple business apps from a single dashboard with seat-based licensing, enabling scalable per-app user management and independent app configuration.
- Engineered a Point of Sale system as the platform's first app including checkout screens, product browsing, onboarding flows, and income statements, delivering a fully functional business tool for end users.
- Designed and implemented a custom role and permission system with toggleable permissions per app using Spatie Permission, providing fine-grained access control for admins and team members.
- Developed email-based invitation workflows for adding members and admins to company apps, streamlining user onboarding and reducing friction for team setup.
- Managed all VPS infrastructure, CI/CD pipelines, DNS configuration, and deployment workflows independently, ensuring stable production uptime and rapid iteration cycles.
- Applied SOLID principles and Repository, Service, and Interface design patterns throughout the Laravel REST API backend, producing maintainable and testable code architecture for long-term platform growth.

EDUCATION

BS Information Technology

2022 to 2026

STI College Davao

Graduated Cum Laude | GWA: 1.39

AWARDS & ACHIEVEMENTS

- Competed in Tagisan ng Talino as Android Mobile Developer at the Cluster Level (2 participations), representing STI College Davao in a regional IT skills competition for Android application development.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, TypeScript, Vue 3, Nuxt.js, React.js, Next.js, Tailwind CSS, Pinia, Zod

Backend: Laravel (PHP), Node.js, RESTful API Design, Graph API, OAuth 2.0, Sanctum, Spatie Permission

Mobile: React Native Expo, Android Studio

Database: MySQL, PostgreSQL, SQLite, MongoDB

Infra and Real-Time: WebSocket, Pusher, VPS Management, DNS Configuration, CI/CD Deployment

Architecture: SOLID Principles, Repository Pattern, Service Pattern, Interface Pattern, Multi-Tenant SaaS Design

Tools: Git, GitHub, Figma, VS Code, Agile/Scrum
