PROFILE SUMMARY

Full Stack Developer building production websites, multi-tenant SaaS, and business applications with Next.js, React, TypeScript, Laravel, and PostgreSQL. Delivers features from database design and REST APIs to frontend implementation, including self-service CMS, CRM lead capture, payment integrations, conversion tracking, and AI automation. Builds tools that help clients manage content, capture sales opportunities, and automate estimating and administrative workflows.

WORK EXPERIENCE

Full Stack Developer

June 2026 - October 2026

Izee, Inc. | Remote

Developed client websites and internal products with Next.js, React, TypeScript, and Supabase/PostgreSQL, primarily for roofing and home-service businesses, enabling clients to manage content, capture leads, and run daily operations.

- Developed custom CMS and admin dashboards for page sections, services, galleries, articles, pricing and SEO settings, enabling clients to publish updates without code changes.
- Optimized image and video delivery with Backblaze B2 storage and Cloudflare CDN caching, improving media loading and reducing repeated requests to the storage origin.
- Integrated Stripe payments, Google Reviews, GA4/gtag, Meta Pixel, Meta Conversions API and validated lead-capture forms, routing enquiries into CRM pipelines and tracking lead and purchase conversions.
- Automated instant roof estimates with Google Solar API satellite measurements, configurable pricing and PDF proposals, giving homeowners preliminary quotes and sales teams property details for follow-up.
- Implemented AI bookkeeping workflows with client-scoped tools, permissions, audit logs and approvals, helping staff categorize transactions and review duplicates/transfers through controlled automation.
- Built e-commerce storefronts with product variants, stock checks, promotions, shipping rules and Stripe checkout.
- Implemented CRM lead/deal pipelines, scheduling availability and document search with Supabase and OpenAI embeddings.

IT Instructor, Part Time

July 2026 - October 2026

STI College | Senior High School Department

- Taught Web Development, Object-Oriented Programming in C#, and Java Programming through coding demonstrations and practical exercises.
- Prepared coding examples, quizzes and laboratory exercises covering control flow, arrays, functions, classes, objects, and JavaScript/jQuery DOM manipulation and events.

EDUCATION

Bachelor of Science in Information Technology

2022 - 2026

STI College Davao | Cum Laude | GWA: 1.39
