

CYRIL JIAN B. NARVASA

Full Stack Developer

+63 906 584 5902 | cyrilnarvasa589@gmail.com | github.com/Cyannimazing | portfolio-cyannimazing.vercel.app

PROFESSIONAL SUMMARY

BS in Information Technology graduate from STI College Davao, bringing enterprise internship experience and solo SaaS product ownership. Proficient in OAuth 2.0, RESTful APIs, Graph API, real-time systems (WebSocket/Pusher), WCAG 2.1 AA compliance, VPS deployment, and CI/CD workflows. Applies SOLID principles and Repository/Service/Interface design patterns in both agile team and fully independent environments.

PROFESSIONAL EXPERIENCE

Software Developer Intern | Obiyen (awork.dk)

January 2026 to June 2026 | Remote, Denmark

Full Stack contributor on an enterprise multi-module SaaS platform using Nuxt.js, Vue 3, Laravel, PostgreSQL, TypeScript, and Pusher.

- Implemented OAuth 2.0 authentication flows for Facebook and Instagram agency-level integrations, enabling secure multi-client workspace access and eliminating manual token management.
- Architected and delivered the Password Manager module end-to-end including licensing, user assignment, REST APIs, service layer, and database schema.
- Designed and built the Timesheet module with approval workflows, project-based hour tracking, monthly reporting, and superadmin override capabilities.
- Constructed the Quotation module end-to-end covering template management, dynamic pricing, PDF/web generation, digital approvals, and reporting.
- Designed and implemented a real-time chat ownership system using Pusher with agent assignment, transfer logic, and concurrent-response prevention.

Full Stack Developer (Solo) | Cynergy (cynergy.cloud)

April 2026 to Present | Philippines

Sole developer on a partner-owned multi-tenant SaaS platform built with Nuxt.js 3, Vue 3, TypeScript, Laravel 12, SQLite, Sanctum, and Spatie Permission.

- Architected a multi-tenant SaaS platform supporting multiple business apps from a single dashboard with seat-based licensing, enabling scalable per-app user management.
- Engineered a Point of Sale system as the platform's first app including checkout screens, product browsing, onboarding flows, and income statements.
- Managed all VPS infrastructure, CI/CD pipelines, DNS configuration, and deployment workflows independently, ensuring stable production uptime.

EDUCATION

BS Information Technology | STI College Davao | 2022 to 2026

Graduated Cum Laude | GWA: 1.39

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, TypeScript, Vue 3, Nuxt.js, React.js, Next.js, Tailwind CSS, Pinia, Zod

Backend: Laravel (PHP), Node.js, RESTful API Design, Graph API, OAuth 2.0, Sanctum, Spatie Permission

Mobile: React Native Expo, Android Studio

Database: MySQL, PostgreSQL, SQLite, MongoDB

Infra & Real-Time: WebSocket, Pusher, VPS Management, DNS Configuration, CI/CD Deployment

Architecture: SOLID Principles, Repository Pattern, Service Pattern, Interface Pattern, Multi-Tenant SaaS Design

Tools: Git, GitHub, Figma, VS Code, Agile/Scrum
